Property Flipping Policy	FHA has placed certain time restrictions and additional documentation requirements on purchase transactions involving the resale of an existing property. The resale period is assessed by from the seller's date of acquisition (settlement date) to the new purchase date (execution date on the contract). The flipping requirements do not apply to a builder selling a newly built home or building a home for a borrower. Resale Time Restriction – 90 days or less A Property that is being resold 90 Days or fewer following the seller's date of acquisition is not eligible for an FHA-insured Mortgage. Resales Occurring Between 91 Days and 180 Days After Acquisition A Mortgagee must obtain a second appraisal by another Appraiser if: the resale date of a Property is between 91 and 180 Days following the acquisition of the Property by the seller; and the resale price is 100 percent or more over the price paid by the seller to acquire the Property. If the second appraisal supports a value of the Property that is more than 5 percent lower than the value of the first appraisal, the lower value must be used as the Property Value in determining the Adjusted Value. The cost of the second appraisal may not be charged to the Borrower.
